

Single Crystal Niobium Technology Workshop

October 30 – November 1, 2006

CBMM and JLAB are jointly organizing a Single Crystal Niobium Technology Workshop at the world's largest niobium mine location Araxá in Brazil. The workshop will be held October 30 – November 1, 2006.

The mission of the workshop is to bring the interested engineers, scientists and technologists to a forum for discussion on the current status of the technology for producing 280 mm diameter niobium single crystal ingots for large-scale high gradient applications of SRF linacs such as the International Linear Collider.
